

APURBA KOLEY

Project Manager · QA Engineer · Open Source Implementer

koleyapurba007@gmail.com · +91 98713 56218 · linkedin.com/in/koleyapurba · gitlab.com/koleyapurba007

PROFESSIONAL SUMMARY

8+ years of progressive IT experience starting as an IT Manager handling Linux server administration and networking (2018), then transitioning into QA Engineering with expertise in manual and automation testing (2022), and currently working as a Project Manager and AI Developer at Applied ElectroMagnetics (2022–Present). Leading delivery of Interceptor Drone, Twin Beam Headlight, and Stabilized Camera projects. Experienced in deploying and managing open-source platforms including OpenRemote, Odoo ERP, Nextcloud, TrueNAS, and Docker to meet business and project requirements.

CORE SKILLS

Testing & QA

Selenium WebDriver · Rest Assured · JMeter · Postman · TestNG · Cucumber BDD · JIRA · SQL

Project & Delivery

Project Planning · Milestone Tracking · Stakeholder Communication · Risk Management · Team Leadership

Technical

Core Java · Maven · Docker · IoT / MQTT · Firmware Testing · Qt Designer · Figma · Networking

EXPERIENCE

Project Manager · Applied ElectroMagnetics Pvt Ltd · Nov 2022 – Present · Noida

- ▶ Leading end-to-end delivery of Interceptor Drone, Twin Beam Headlight, and Stabilized Camera projects
- ▶ Managing cross-functional teams across embedded, firmware, RF, and software domains
- ▶ Driving hardware-software integration planning, sprint coordination, and client milestone reporting

Software Tester · Lazot Technologies Pvt Ltd · Mar 2022 – Oct 2022 · Kolkata

- ▶ Executed functional, regression, and REST API testing across web and embedded applications

Associate · Wipro Technologies · Aug 2021 – Feb 2022

- ▶ Content moderation QA and policy compliance for social media platform operations

IT Manager · Core Integra Pvt Ltd (TCS-ION) · Sep 2018 – Jun 2021

- ▶ Managed Linux servers, network infrastructure (TCP/IP, switches, routers, VPN, firewall) and hardware troubleshooting
- ▶ Administered server deployments, maintenance, and uptime monitoring across connected systems
- ▶ Spearheaded online assessment process coordination and technical leadership across multiple teams

CURRENT PROJECTS

Interceptor Drone

UAV system for detection and interception of unauthorized aerial targets — defence application.

- ▶ Managing project planning, team coordination, milestone tracking, and client reporting as Project Manager
- ▶ Developing core AI software for target detection, tracking, and interception decision logic
- ▶ Coordinating firmware, RF, and software teams for full system integration and field trials

Twin Beam Headlight

Adaptive dual-beam automotive lighting system with embedded control logic.

- ▶ Leading project as Project Manager — overseeing timelines, vendor coordination, and delivery sign-off
- ▶ Handling hardware-software integration testing and acceptance criteria verification

Stabilized Camera System

Gimbal-based camera stabilization unit for drone and ground vehicle platforms.

- ▶ Managing end-to-end project delivery as Project Manager — requirements, milestones, and stakeholder alignment
- ▶ Leading functional validation and cross-team coordination across hardware and software domains

PAST PROJECTS

Integrated Passenger Information System (IPIS) – Railway

Unified audio/visual passenger information system across station displays.

- Built full test suite covering DB-to-display data flow; ran smoke, regression, and UAT cycles

MAFI VCCS – Indian Air Force

Centralized Voice Communication Control System for military airspace operations.

- Integration tested PSTN, radio, softphone, and IP phone hardware against Asterisk server

Multi Section Digital Axle Counter (MSDAC) – CEL India

Fail-safe railway track occupancy detection with two-out-of-three architecture.

- Designed Qt GUI, wrote functional test cases, and validated edge cases under runtime signals

Water Purifier – Conscient

IoT-enabled water purification with low carbon footprint and HMI interface.

- Designed and developed display UI on DWIN HMI panel for real-time user interaction and system feedback
- Deployed and configured OpenRemote on cloud platform for end-to-end IoT data monitoring via Docker
- Performed full E2E testing across sensor board, motherboard, HMI display, and cloud dashboard

EDUCATION

B.Tech · St. Mary's Technical Campus · 2016 · CGPA: 80%

12th (Higher Secondary) · Kotulpur High School · 2012 · 67%

10th (Secondary) · Kankeswari High School · 2010 · 83%

CERTIFICATIONS

- ◆ **Certificate of Completion: Claude 101** — Anthropic · Jun 2026
- ◆ **Introduction to DevOps** — Great Learning · Jan 2023
- ◆ **Python Fundamentals** — Great Learning · Jan 2023
- ◆ **JMETER From Scratch On Live Apps** — Udemy · Sep 2023
- ◆ **Selenium** — Great Learning Academy · Jun 2023
- ◆ **Introduction to Selenium** — Simplilearn · Jun 2023
- ◆ **Qspider Certified Software Tester** — QSpiders – Software Testing Training Institute · May 2022
